

NO-WAX/E

The Softest Lens Ever.

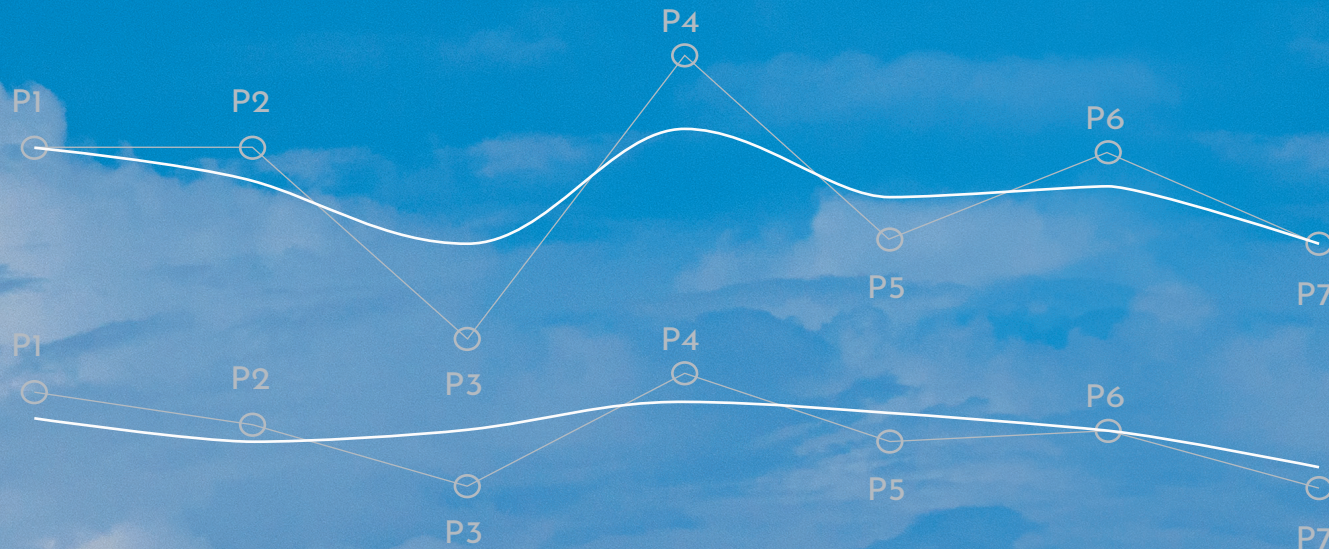

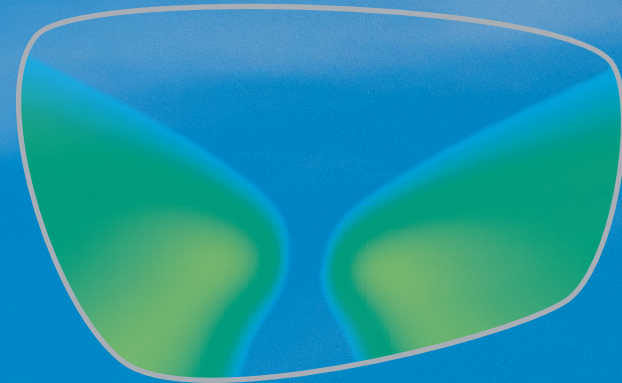

THE OPTICAL LENS DESIGN SOFTWARE

Indulge in Unmatched Eye Comfort

With an unprecedented reduction in overall astigmatism, this design sets a new standard for comfort, establishing itself as the most comfortable progressive design with remarkably swift adaptation times.

Built upon BES technology, during the calculation phase, the astigmatism of each individual point in the Nowayve lens is analyzed and recalculated based on the values of the surrounding points. The result is a lens that is exceptionally smooth in vision transitions and extremely comfortable to wear.
